

COVID-19 Touch Point Disinfection Recommendations for Swimming Pool and Spa Facilities

Public and Semi-Public Swimming Pool and Spa Facilities

Comprise of Public and Semi-public Swimming Pool and Spas that are visited by the general public. Frequency of disinfection will vary based on patron traffic.

Cleaning

Refers to the removal of dirt and impurities, including germs, from surfaces. Cleaning alone does not kill germs. By removing the germs, it decreases their number and therefore any risk of spreading infection.

Disinfecting

Works by using chemicals to kill germs on surfaces. This process does not necessarily clean dirty surfaces or remove germs. But killing germs remaining on a surface after cleaning further reduces any risk of spreading infection.

EPA Tested Sanitizers and Disinfectants

Follow all manufacturer's directions, in particular, mixing chemical concentrations, application, and contact time.

Disposable Gloves

An extra layer of protection during cleaning activities is advisable.

Proper Handwashing After

Disinfecting Patron Areas

Wash your hands frequently with soap and water for at least 20 seconds.

Personal Hygiene of Patrons

Enforcing safety and sanitation rules such as the following:

- Showering before pool entry
 - Frequent bathroom breaks
 - No ill persons
 - No diaper changing at poolside
 - Protection of clean towels
 - Provide hand sanitizer for patrons
