PUBLIC COMMENT

Paul Wright, *West Point*, said that he understood what the departments are trying to do that have hired quality people. The departments that have had more flexibility in their spending in the past want to increase their spending. Mr. Wright said that he looks at the total dollars spent. If pay increases are warranted then he supports them, but does not support increasing the budget. There are many departments that support things that not everyone appreciates or uses, such as the Parks Department, the Library, the Amphitheater, and the Wabash River Enhancement. Mr. Wright stated that if he remembers correctly the County is supporting the Wabash River Enhancement \$500,000 per year to benefit a few people. Perhaps those departments could have fundraisers for those extra, unnecessary items. That way the people who use those facilities can support them instead of everyone. Mr. Wright said that he is for everyone paying their own way. He added that he is in favor of management taking a cut because they have not taken a cut during this recession.

Commissioner Byers, *President of the Board of Commissioners* said that he understands that Mr. Wright does not want to pay for facilities that he does not use. However, there are people who do use those facilities and they do attract businesses to the area which does promote growth.

Commissioner Murtaugh moved to adjourn.
